SHAZIM JAVED

Pursuing BS in Computer Science | Data Science & AI | Python

+92 3277228848 @ shazimjaved448@gmail.com GitHub LinkedIn Faisalabad, Punjab, Pakistan

SUMMARY

Computer Science undergraduate (BSCS, graduating 2027) with strong skills in Python, Machine Learning, and Computer Vision. Built ML/DL-powered applications including recommender systems and healthcare prediction models & Detection Systems in Computer Vision. Passionate about applying AI to real-world problems and pursuing a future as an AI/ML Engineer.

EXPERIENCE

07/2025 - 09/2025

Lucknow, Uttar Pradesh, India

Python Programmer

CodeAlpha

Technology company focused on software development

- Collaborated with a team of 4 to build a movie recommender system deployed on Flask, achieving 95% accuracy on test dataset.

03/2025 - 06/2025

Faisalabad Division, Punjab, Pakistan

Python Programmer

Techhub Innovation

Innovation hub for technology advancements

- Contributed to Python programming efforts in various projects
- Collaborated in a team to deliver software solutions

SKILLS

Python | Machine Learning | Computer Vision | Deep Learning | NLP

PROJECTS

License Plate Detection System

Designed a real-time system using YOLO and OpenCV to detect and recognize vehicle plates, integrated with a CSV-based database for retrieval.

AI Powered Attendance System

AI-powered attendance system using face recognition technology to automatically identify and record employee attendance.

Multimodal Sign Language Translation System

AI-powered mobile app translating between sign language and speech in real time, using gesture recognition, speech-to-text, and 3D avatar animation

Advanced CardioVascular System

It is a cutting-edge web application that leverages state-of-the-art machine learning algorithms to assess heart disease risk factors with 92%+ accuracy

EDUCATION

09/2023 - 05/2027

Faisalabad, Pakistan

BS Computer Science

University of Agriculture, Faisalabad

CGPA 3.5 / 4.0

09/2021 - 08/2023

Okara, Pakistan

FSC

Punjab Colleges

CERTIFICATION

IBM DATA SCIENCE

IBM

Advance Python Programming

National Vocational & Technical Training Commission

Machine Learning Specialization

DeepLearning.AI & Stanford Online

Building Generative AI-Powered Applications with Python

IBM

KEY ACHIEVEMENTS

Computer Vision (OpenCV) Projects

Created License Plate Detection system using YOLO & OpenCV, integrated with CSV-based vehicle database.
Implemented Hand Gesture Recognition app using OpenCV & MediaPipe.
Built Face Mask Detection model using CNN & OpenCV for real-time monitoring

Machine Learning Projects

Achieved 98% R^2 score on House Price Prediction model using regression techniques.
Developed Laptop Price Prediction system with 0.16 MSE, deployed as a Flask web app.
Built and deployed Movie Recommender System, improving recommendation accuracy for users.
